NEW!

Intellimix Pro + Intellimix Focus:

Not one, but two new Intellimix Desktop Mixers enter the stage! The growing Intellimix family satisfies the demand for diversity in feature sets. While Intellimix Pro comes as a full-blown 8-channel mixer with advanced AoIP connectivity as standard, extended I/Os and settings, Intellimix Focus is a 4-channel device that highlights the important key features most users ask for.

Intellimix Pro is designed as a mixing device to master every imaginable and complex 8-channel mixing task. Thanks to remote control options, admin mode and an unlimited amount of user profiles, Intellimix Pro is the ideal desktop mixer for shared workplaces used for multiple different workflows. As standard, it offers connectivity to run multichannel AES67, Livewire+, RAVENNA, MADI, NMOS and ST2110.

Intellimix Focus addresses users that do not need to handle more than four channels. User's no longer need to handle detailed adjustments that may distract them from their actual mixing. It's the ideal solution for single work places and less technically experienced users. As such it is the perfect replacement for every first-generation Intellimix.

m!ka CamStud

Ready, set, action!
For years the m!ka Mounting System has been the no. 1 solution to arrange microphones and monitors. Now we further extend the system by introducing the brand-new m!ka CamStud.

From now on, it allows you to easily integrate any camera to your setup via 1/4” thread. Simply place m!ka CamStud on top of a m!ka Pole or directly on your m!ka Mic Arm. Securing a clear view, the integrated ball joint gives you the perfect camera angle. You’re all set for any camera action.

iXm Podcaster NEW!

Podcaster’s best friend!
Clear the stage for a whole new edition of the iXm Recording Mic. Dedicated to the needs of the growing podcast community, the new iXm Podcaster perfectly suits as the universal recording device for any ambitious podcaster. As a budget pleasant pick, it is the perfect solution for every podcaster who longs for the iXm’s recording quality provided by Yellowtec’s unique LEA Level Engine.

Interviews. Podcasts. Easy audio video sync.
