

b-line

Talk Show System

As a powerful multiline talk show system, b-line offers world-wide connectivity for POTS and VoIP. Use it to integrate all your telco and control lines over one single LAN interface.

Combine up to two callers with b-line XT and choose the b-line bold phone hybrid to manage up to six callers at the same time.

b-line allows you to manage multiple callers with worldwide connectivity for POTS, ISDN and VoIP. Various software extensions get you additional features.

b-line delivers an extremely full and rich sound, no matter which kind of device your callers use. You receive first-class talk show audio.

Every b-line comes with the intuitive and versatile Talkmaster® screener software. b-line Keypads offer the perfect solution for those who prefer tangible keys.
